## 8000 Features

- Heavy Duty Tubular Steel Frame
- Heavy Duty Legs
- Durable Hi-Gloss Powder Coated Paint
- Stainless Steel Panels And Hood
- Enclosed Heating Chamber
- Unitized High Pressure Heating Manifold
- Incoloy Encased Elements
- Temperature High-Limit Control
- Pressure Relief Valve
- Triplex Plunger Belt Driven Pump
- Zero Pressure Unloader
- Trigger Gun Control
- Stainless Steel Float Tank
- Low Water Shut Off Protection
- Reduced Flow Protection
- Wire Braid Discharge Hose
- Quick Coupled Stainless Steel Nozzles
- Automatic Shutdown Timer
- Watertight Electrical Panel
- Diagnostic Control Monitoring Lights
- Washer Fail-Safe Monitoring System
- 24 Volt Controls
- Calibrated Detergent Mixing Valve
- Lighted Solenoid-Controlled Detergent System

## Factory Installed Options

- Hour Meter • Remote 2-Way
- 230 Volt 3 Phase • Soap Solenoid

### It's Electric

Our environmentally friendly Eco-Green 8000 Series hot water washers are electrically heated and monitored providing you with the ultimate high pressure cleaning equipment while minimizing the impact on our ecology.

8000 Series pressure washers are revolutionary hot water washers equipped with heavy-duty, removable high pressure heating elements which heat water instantly. Plus, our exclusive system protection devices monitor water flow, water pressure and water temperature to keep your washer running strong.

The powerful 8000 Series is capable of pressures from 1200-3000 PSI and water flow from 2-4 gpm. The 8000 is ideal for those situations when open flames or exhaust cannot infiltrate the cleaning area. This unit's innovative design includes state-of-the-art controls and safety features.

All machine controls are 24 volt and an optional remote control is available.

When the cleaning job calls for an ultra-reliable, electrically-heated hot water washer, make sure it's an Aaladin 8000.

MODEL	8212	8320	8430
FLOW OUTPUT (GPM)	2	3	4
PRESSURE RATING (PSI)	1200	2000	3000
KW	30kw	60kw	60kw
HEAT RISE*	110°	140°	110°
MOTOR HORSEPOWER	4	4	7.5
VOLT	230/440	230/440	230/440
AMP	80/40	170/85	180/90
PUMP TYPE	Ceramic Plunger	Ceramic Plunger	Ceramic Plunger
PHASE	3	3	3
DISCHARGE HOSE	3/8" x 50'	3/8" x 50'	3/8" x 50'

### DIMENSIONS

LENGTH	32"	32"	32"
WIDTH	24"	24"	24"
HEIGHT	48"	48"	48"
APPROXIMATE WEIGHT (LBS)	330	370	470

\* Heat Rise plus incoming water temperature will equal the outgoing hot water temperature.
